

AMENDMENT TO THE CLAIMS

Claim 13. (original) A system for generating at least one of an insurance cancellation certificate, an insurance renewal certificate, or proof of insurance, from at least one remote computer terminal connected by a computer network to a central computer, the system comprising:

at least one remote computer terminal;

a central computer;

a database stored on the central computer in which data relating to at least one insurance policy is stored;

software embodied in computer code configured to enable the at least one remote computer terminal to interact with the data stored in the database;

a communicative connection connecting the at least one remote computer terminal with the central computer;

wherein the software flags, for review by a user of the at least one remote computer terminal, a flagged list of at least one expiring insurance policy corresponding to the data stored in the database; and

wherein the software enables the user of the at least one remote computer terminal to control, in response to the review of at least a portion of the at least one expiring insurance policy, the local printing of at least one of the insurance cancellation certificate, the insurance renewal certificate, or proof of insurance relating to one or more of the at least one expiring insurance policy, from the at least one remote computer terminal.

Claim 14. (original) The system of claim 13, wherein the insurance cancellation certificate, the insurance renewal certificate, or the proof of insurance corresponds to insurance for a vehicle.

Claim 15. (original) The system of claim 14, wherein the vehicle is an automobile.

Claim 16. (original) The system of claim 14, wherein the vehicle is considered a “black car”.

Claim 17. (original) The system of claim 13, wherein the insurance cancellation certificate is a standardized insurance termination certificate in accordance with an FH4 form.

Claim 18. (original) The system of claim 13, wherein the insurance renewal certificate is a standardized insurance renewal certificate in accordance with an FH1 form.

Claim 19. (original) The system of claim 13, wherein the proof of insurance is a standardized proof of insurance certificate.

Claim 20. (original) The system of claim 13, wherein the at least one remote computer terminal comprises an interface, and wherein the interface displays the flagged list for review by the user of the at least one remote computer terminal.

Claim 21. (original) The system of claim 13, wherein the flagged list is generated automatically.

Claim 22. (original) The system of claim 13, wherein the flagged list is generated automatically on a periodic basis.

Claim 23. (original) The system of claim 13, wherein the flagged list is generated automatically on a daily basis.

Claim 24. (original) The system of claim 13, wherein the software runs on the central computer.

Claim 25. (original) A system for automatically generating at least one of an insurance cancellation certificate, an insurance renewal certificate, or proof of insurance, from at least one remote computer terminal connected by a computer network to a central computer, the system comprising:

- at least one remote computer terminal;

- a central computer;

- a database stored on the central computer in which data relating to at least one insurance policy is stored;

- software embodied in computer code configured to enable the at least one remote computer terminal to interact with the data stored in the database;

- a communicative connection connecting the at least one remote computer terminal with the central computer;

- wherein the software flags a flagged list to be transmitted to the at least one remote computer terminal, wherein the flagged list comprises at least one expiring insurance policy corresponding to the data stored in the database; and

- wherein the software enables automatic local printing, in response to receiving the transmitted flagged list, of at least one of the insurance cancellation certificate, the insurance renewal certificate, or proof of insurance relating to one or more of the at least one expiring insurance policy, from the at least one remote computer terminal.

Claim 26. (original) The system of claim 25, wherein the insurance cancellation certificate, the insurance renewal certificate, or the proof of insurance corresponds to insurance for a vehicle.

Claim 27. (original) The system of claim 26, wherein the vehicle is an automobile.

Claim 28. (original) The system of claim 26, wherein the vehicle is considered a “black car”.

Claim 29. (original) The system of claim 25, wherein the insurance cancellation certificate is a standardized insurance termination certificate in accordance with an FH4 form.

Claim 30. (original) The system of claim 25, wherein the insurance renewal certificate is a standardized insurance renewal certificate in accordance with an FH1 form.

Claim 31. (original) The system of claim 25, wherein the proof of insurance is a standardized proof of insurance certificate.

Claim 32. (original) The system of claim 25, wherein the flagged list is generated automatically.

Claim 33. (original) The system of claim 25, wherein the flagged list is generated automatically on a periodic basis.

Claim 34. (original) The system of claim 25, wherein the flagged list is generated automatically on a daily basis.

Claim 35. (original) The system of claim 25, wherein the software runs on the central computer.
